10164	GEN_CMN 201-0 Res Meth in Comm	70	MW	8:30 AM	9:45 AM	NUQ2-255	Mishra,Rajiv	This course introduces students to the basic research concepts, methods, and tools used to design, conduct, and interpret studies in communication and other fields. We will examine both quantitative and qualitative approaches, including experiments, surveys/interviews, ethnography, field research and content analysis. The course investigates the basic process common to investigations of a variety of research questions from the communication field. Students will become critical and informed research consumers, developing proficiency at evaluating research. Additionally, students will learn how to design an original study to answer a research question.	None	Sophomores and above, MIT majors only	No	
10220	MIT 143-0 Acting: Basic Techniques	70	U	5:30 PM	8:30 PM	NUQG-310	Queiroga,Ioao	This course introduces the process of storytelling through acting exercises grounded in observation, imagination, and improvisation. Coursework focuses on perceiving, studying, and recreating human behavior for the purpose of developing stronger stage presence and becoming a more effective communicator. The basic principles of acting are important for communication, storytelling, and performance skills any career choice, on stage and in life. 10195	MIT 214-0 Comm Tech & Society	70	MW	10:00 AM	11:15 AM	NUQ3-216	Maharjan,Harsha Man	The first half of the course will address the smartphone and other more recent digital hardware and software technologies (e.g., the Internet, the World Wide Web, computer games, the physical information infrastructure, Google, WhatsApp, YouTube), along with policy controversies surrounding them, such as commercial and political surveillance, intellectual property and file-downloads, drone applications, "net neutrality", and Internet governance. The second half will explore how human society developed and used communication technologies from the earliest cave paintings and alphabets, through stone carving, clay tablets, papyrus, paper and the printing press; and then the telegraph, cables, telephone, recorded sound, radio, cinema and television. Students will acquire an introductory overview of how society has shaped communication technologies over the course of human history, and how in turn society has been shaped by their uses. They will develop understanding of major policy and analytical controversies surrounding their applications, including issues of access to media technologies and more general arguments concerning the interrelation of economic and political power with technology. 10111	MIT 220-0 Media Texts	70	UTR	2:30 PM - 3:45 PM (UT) 2:30 PM - 5:30 PM (R)		NUQG-337(UTR)	Curtis,Scott	This course is an introduction to the study and structure of film and other moving-image media. We will define and examine the expressive and aesthetic power of the basic elements of the moving image. Specifically, the course will investigate—across a variety of different media, modes and genres, and historical periods—the fundamentals of production design; cinematography, especially the shot and its composition; editing; sound; and narrative structure. The first half of the course examines the separate elements of the moving image; the second half explores how those elements can be organized in various narrative and non-narrative structures. The goals of the course are (1) to acquaint students with a vocabulary specific to film and other moving-image media; (2) to provide students with the critical tools required for analysis of the moving image; and (3) to develop student skills in writing and argument for humanistic inquiry. By the end of the course, students will be able to: (1) identify the elements of the moving image (e.g., kinds of camera movement) and of the soundtrack according to a standard glossary of technical terms; (2) describe patterns of similarity, repetition, difference, and variation in the image and sound tracks; (3) propose connections between those patterns and narrative structure, character psychology, or larger themes and ideas; and (4) explain those connections in a written argument about how patterns in the most salient visual and/or aural elements of a film or program help us to understand its structure, characters, or themes. 10133	MIT 298-0 Undergraduate Seminar: Sound and Society NEW	71	UT	8:30 AM	9:45 AM	NUQ1-245	Tayeb,Leila	Does the way that we hear change from place to place and in different time periods? How do we learn to listen and to understand sound? This course explores sound and listening as historically and culturally situated phenomena through the interdisciplinary field of sound studies. Locating sound, music, noise, hearing, and listening in a range of locales, we explore the auditory cultures that imbue our everyday lives with volume and feeling. Students will read from a range of disciplines and perspectives on sound, undertake listening assignments, write reflection essays, and explore a topic of their choosing in further depth. This is a course intended to ground students in sound studies as a critical, theoretical endeavor. It complements but does not include or replace coursework in sound production. 10188	MIT 298-0 Undergraduate Seminar: GenAI/NLP in Media Innovation NEW	72	UT	11:30 AM	12:45 PM	NUQ1-302	Zaghouni,Wajdi	Delve into the exciting world of AI with 'ChatGPT & NLP in Media Innovation,' a course designed to introduce the revolutionary impact of artificial intelligence in the media landscape. This course offers an in-depth exploration of ChatGPT and Natural Language Processing (NLP) tools and techniques, highlighting their applications in modern media. Students will gain practical experience in utilizing AI for data analytics, content creation, and reshaping traditional media formats. The curriculum includes an overview of AI fundamentals, a deep dive into the capabilities of ChatGPT, and hands-on projects using NLP tools for text analytics and creative writing. Designed for humanities and social sciences students, this course requires no prior technical background. Through a blend of lectures, interactive workshops, and project-based learning, students will uncover the potential of AI. The course promises to equip students with cutting-edge skills, preparing them for the evolving landscape of digital media.	None	Sophomores and above	No	MIT Technical-Practical Course
10189	MIT 298-0 Undergraduate Seminar: Understanding Media Industries	73	MW	11:30 AM	12:45 PM	NUQ2-258	Khalil,Joe	This course provides an understanding of media industries as structures of production, distribution, aggregation, and exhibition. Though writers, directors, and producers are key players in the development of media content, this course focuses on the business of media. Rather than providing a history of various media, we map the field of media industries as a discipline. We then examine terminologies, frameworks and methods that explain current dynamics and processes. The rest of the course will be dedicated to evaluating how media and technological developments change based on factors like ownership, regulation, marketing and branding. This hybrid course offers insights for students who desire to create media, introducing various contexts to help them define their place as an artist who must also be a businessperson. 10223	MIT 298-0 Undergraduate Seminar: Production Research	74	MW	4:00 PM	5:15 PM	NUQ2-258	Khalil,Joe	Students learn essential knowledge and develop skills in conducting research for media productions. This course is part lecture, part workshop, and part practice. The goal of this course is to equip you with basic knowledge and resources to develop skills in researching for media productions. This course links research and production practices for developing scripts and documentaries. You will work individually and in groups. The emphasis will be on getting a creative/production researcher's experience. The class is divided in three modules covering media production research, ethnography, and oral history. We will engage foundational theoretical questions of the creative treatment of reality in film, and we will discuss how major movements in the history of documentary have responded to those questions with widely varying forms. Each of these shifts in documentary practice throughout its long history has challenged notions of cinematic truth in order address the social, aesthetic, and technological realities of its particular place and time. The course will focus primarily on feature-length documentary cinema, but it will also include some discussion of short-form, art-gallery, and web based interactive documentary. 10162	MIT 325-0 Film, Media & Gender: Girls' Media Culture	70	UT	2:30 PM	3:45 PM	NUQ2-256	Pike,Kirsten	Although media made for girls has long been derided as silly and undeserving of close attention, to the millions of preteen and teen girls who consume it, it is anything but insignificant. From novels and movies in the 1930s featuring teen sleuth Nancy Drew to contemporary films and TV shows such as Whip It, Wadjda, and That's So Raven, girls' media artifacts have functioned as important historical sites for the negotiation of cultural politics and youthful feminine ideals. In order to shed light on the often-overlooked history of girls' media, this course offers a critical investigation of (primarily) U.S. girls' media from the 1930s to the present, including novels, films, TV shows, advertisements, music videos, teen magazines, toys, and new media. We will investigate girls' media artifacts as aesthetic, political, and commercial texts through which youth have interfaced with lessons about gender, sexuality, race, ethnicity, class, national identity, and generation at different historical moments. Although American commercial media will be taken up as our main object of study, students will have opportunities to explore media made outside the U.S. in their own research projects, and we will consider girls' independent production and reception practices in both Western and non-Western contexts. Ultimately, the goals of the course are: 1) to explore the dominant strategies utilized by the media industries to represent female youth and their concerns, as well as those utilized by girls in practices of self-representation; 2) to examine girls' reception of and diverse engagements with media; and 3) to consider how the landscape of girls' media production and consumption has changed, and resisted change, over time. 10163	MIT 325-0 Film, Media & Gender: Gender in Film	71	UT	4:00 PM	5:15 PM	NUQ1-245	Mokhtar,Sherham	This course explores how the issues of gender are integral to understand and analyze film form or moving images. The course takes an intersectional approach and considers gender as a concept that intersects with the issues of race, class, sexuality, and nationality and interrogates how these issues shape the film form and how they are presented and negotiated in films produced in different parts of the world. Students will engage with different cultural contexts in which film and gender operate and thus will be able to also do cross-cultural film analysis and comparison of the issues of gender. Students will use interdisciplinary and transnational film theory and will utilize these theoretical frameworks to conduct in-depth analysis of films. 10156	MIT 380-0 Lighting and Cinematography	70	T	5:30 PM	8:30 PM	NUQG-310	Queiroga,Joao	This class explores advanced lighting and camera techniques. Students will gain an appreciation for the aesthetics of cinematography across several eras and styles, while practicing with the latest digital cameras, lenses, and lighting kits. Students will learn to use cinematography to bring the story to life across multiple genres (documentary, comedy, drama, horror, etc.). They will also learn to organize crew and production schedules for smaller-budget films and be exposed to alternative styles of cinematography. The course aims to examine elements crucial for visual storytelling, including composition, depth of field, and lighting; and to impart organizational principles for an efficient set. By the end of the course, students will be able to make informed creative choices regarding lenses, framing, and lighting; break down a script according to the needs of their project; create a production schedule that will allow timely acquisition of all necessary coverage; delegate tasks to crew members; discover a personal leadership and collaboration style; and match creative and technical expertise to their specific project. 10140	MIT 398-0 Undergraduate Seminar: Intercultural and International Communication	70	UT	11:30 AM	12:45 PM	NUQ2-258	Akdenizli,Banu	Intercultural and international communication. As a result of new communication technologies, the movement of people across borders, global media, transnational organizations, and economies, the need for intercultural and international communication understanding and competency has become more salient than ever. This course examines the relationships between communication and national cultures. The course covers theory and research in intercultural and international communication and aims to identify and describe the many different ways we communicate and interact across cultures and nations. Through a combination of research projects, discussion, and case studies some of the issues that will be discussed are: theories of symbolic interaction, nonverbal communication, world-system theory, global flows of information, interaction between beliefs and identities, the importance of power and context in intercultural and international communication. By the end of this course students should be able to read and analyze current research in intercultural and international communication from multiple research paradigms; learn skills to communicate effectively across culturally diverse environments by identifying challenges that arise from differences, increase intercultural competence by creatively addressing those challenges, broaden perspectives of culture and people in general and build capacity to adapt by exploring cultural and international similarities and differences. 10152	MIT 398-0 Undergraduate Seminar: Global Turkish TV Drama NEW	82	UT	4:00 PM	5:15 PM	NUQ2-257	Celikkol,Yasemin	Over the past decade and a half, the world became captivated by the allure of Turkish television dramas. Viewers became enamored by attractive actors, tantalizing views of Istanbul, and compelling narratives. Turkish TV series unraveled local cultural dynamics, histories, and anxieties. This class, by first tracing the history of Turkish television leading to the global distribution of Turkish dramas, will then journey around the globe to explore the impact of Turkish series while considering the following questions: How did the local Turkish television industry metamorphose into a global media player? What do global audiences find appealing in Turkish series and what awakens anxieties? What do the globalized Turkish series reveal about local media industries, geopolitics, culture, and everyday life? Through a multidisciplinary approach, this course will provide students with an in-depth understanding of globalized Turkish dramas and their societal impacts and introduce them to a variety of research methods and theoretical frameworks pertinent to the study of global media phenomena. Engaging with a wide range of academic resources, case studies, and media content, students will gain comprehensive insights into the dynamics of global media flows and their interplay with cultural identity, political economy, and transnational exchange. 10131	GEN_CMN 202-0 News and Numbers	70	UT	11:30 AM	12:45 PM	NUQ2-227	Kozman,Claudia	Introduction to statistics for journalism students. Students will discuss ways to detect fraud in government data, methods for dissecting academic research from scholarly journals (as well as research promoted in press releases), and strategies for reporting numbers to a mass audience, among other skills. Students will become deeply familiar with SPSS software. Covered topics include those common in general statistics courses, including the Central Limit Theorem, descriptive and inferential test statistics, correlation, One- Way and Two-Way Analyses of Variance, and multiple regression. Specific attention is given to challenges journalists encounter in reporting numbers.	None	Sophomores and above, Journalism majors only	No	
10121	JOUR 201-0 Journalistic Storytelling	70	UT	10:00 AM	11:15 AM	NUQG-200	Abusharif,Abraham	Students will produce a range of journalism stories across a variety of forms and platforms: writing for print and digital outlets, as well as creating audio, video and interactive graphics. You will also learn how to amplify your storytelling by tapping into social media tools to reach, attract and interact with a wider audience. This class is conducted in a collaborative atmosphere within a newsroom environment to produce stories prepared for the digital age. You will develop a strong sense of journalistic news judgment and be prepared to learn advanced areas of reporting and storytelling in future classes. This course builds on the introductory experiences in journalism received and techniques learned in your first year, developing these to master basic skills of journalism used in every storytelling format. These include news judgment, information gathering (including sourcing, discovering and covering different kinds of news, interviewing techniques, practices of inclusion and sensitivity); constructing stories (including leads, story structure, using quotes, using data to tell a story, assessing information); editing and presentation (grammar, punctuation, AP style, voice, tone and clarity); and visual literacy and presentation. This course emphasizes the critical practices of ethical journalism and deadline reporting and storytelling. The course also expands students' experience and skills in the use of multi-platform tools needed for effective, relevant and engaging storytelling for specific audiences. Professors will guide students in their continued development of reporting, interviewing, writing and researching with a sophisticated audience understanding using text, photos, audio and video for print, broadcast and/or digital platforms. Such stories commonly appear on established podcasts like This American Life, Radiolab and Embedded and many others. The course will run as a small newsroom, complete with pitch meetings and workshops. After a quick introduction to audio equipment, you will create two broadcast-worthy audio features. You will produce your stories through an editing workflow and will workshop each other's' stories. We'll cover how to best write for the ear, and you'll receive coaching to record narration in the studio. We will spend time every week listening to excellent audio stories to help you learn to identify what makes for good radio story subjects and sources. 10123	JOUR 321-0 Storytelling: Mag & Feat. Wrtg	70	UT	11:30 AM	12:45 PM	NUQG-200	Abusharif,Abraham	Magazine and Feature Writing students will be introduced to the editorial and multimedia flank of the magazine world (online and print), a huge and storied part of not just journalism but an influential sphere of public discourse—political and cultural. Students will learn to write and edit various "kinds" of magazine stories. Though they originated in print magazines, these archetypal stories have seamlessly transitioned in online publications to a significant extent. (We will discuss the differences between online stories and print.) This is a writing-emphasized, editing-dependent class. But it is not exclusively about writing. You will learn important skills and will be shown an expansive venue for your story ideas, storytelling abilities and, of course, your unique writing style and writer's voice. NEW: It will also accept audio-visual storytelling. By this point in the journalism program, students are expected to have advanced writing skills so that we may focus more on the various structures and approaches to magazine writing. Students are expected to develop their story ideas (in close consultation with your instructor and classmates) and find sources required to produce interesting and well-told stories. Also, you will produce your own multi-media accompaniments to your stories. As such, you will be introduced to open-source offerings that permit students to design creative art concepts intended to accompany and augment their written pieces. An example is the work done by Medill's Knight lab.	JOUR 301-0 OR JOUR 301-1 with a C or better	Juniors and above, Journalism majors only	No

10168	ENGLISH 379-0 Special Topics: African Cinema	71	MW	10:00 AM	11:15 AM	NUQ2-256	Hodapp,James	This course provides students with an introduction to African filmmaking. Although Africa has been represented on screen essentially since the birth of cinema, it is only within the last 60 years that it has had a cinema of its own in which African filmmakers made their own films. In the early 20th - century colonial powers used cinema as ethnography and propaganda to represent Africa as savage, dark, mysterious, and dangerous to legitimize their oppressive regimes. Hollywood also misrepresented Africans in popular films such as the Tarzan series (1918 - 2016) and King Solomon's Mines (1937). While this course acknowledges this pre-history, it is ultimately interested in the period beginning in the 1960's when most African nations gained independence. We will tackle a variety of filmic forms, aesthetic, and ideologies employed by African filmmakers from the independence era until today including (but not limited to) social realism, anti-colonialism, short films, animation, avantgardism, and science fiction. We will also examine the social and political issues that many African films address including gender politics, racism, Eurocentrism, migration, corruption, human rights, and Westernization while also acknowledging that we need not saddle African cinema with a burden of representing Africa any more than we do for any other cinema. In other words, African cinema is also entertainment. Moreover, we will discuss how films are circulated, funded, distributed, and consumed – including the role of piracy. Primarily, the course focuses on sub-Saharan black African cinema but does include some North African films to gesture to the enormity of the geography covered by African Film Studies. 10170	INTERDIS 202-0 Interdisciplinary Topics: Intro to Performance Studies	71	UT	10:00 AM	11:15 AM	NUQG-310	Tayeb,Leila	Through a broad exploration of performance, both on stage or screen and in everyday life, this course offers an introductory grounding in the (inter)discipline of performance studies. We look at music, theater, dance, sporting events, gender, race, political action, and beyond not as separate domains but rather as related acts of human communication, i.e. performance. In addition to exploring what performance is, the course also explores what performance does. Through a combination of written assignments and staged performance projects, students engage in embodied and collaborative learning. We further take up performance as concept, analytic, and method to understand the social world, paying particular attention to Global South contexts. Students should leave the course able to differentiate the key concepts of performance and performativity, and apply these to a wide range of phenomena. 10172	INTERDIS 202-0 Interdisciplinary Topics: Intro to Infrastructure Stud.	73	MW	11:30 AM	12:45 PM	NUQ3-203	Mishra,Rajiv	This course will introduce students to the interdisciplinary field of infrastructure studies, beginning with basic concepts to understand the broader contextual and embedded understanding of infrastructures. The course will explore the imagination of infrastructures and the centrality of technology in building and creating infrastructures. Students will learn about technological infrastructures such as digital infrastructures, transportation infrastructures, and others. The course will situate infrastructures in historical, political, social, and cultural contexts. Students will learn about governments, nongovernmental organisations, and experts who plan, build, and operate different infrastructures in national, international, and global contexts. The course will also look at the way infrastructures unfold on the ground, and their social and cultural interactions with users/people, as well as the engagement and negotiation people have with different infrastructures in their everyday life, and their experience and understanding of infrastructures. Along with the social and cultural interaction of infrastructures, students will learn about how infrastructures interact with their surrounding environment in which they are built and operated, and the various impacts and implications. The course aims to help students draw a broader critical introductory understanding of infrastructures.	None	First-Year Students, sophomores and ABP Dual Enrolled students	Yes	
10117	INTERDIS 203-0 Ways of Knowing	70	UT	11:30 AM	12:45 PM	NUQ1-300	Al Hroub,Khaled	At Northwestern, we ask students to take liberal arts courses. There is an inherent belief that these courses lead us to better know the world around us. In this Ways of Knowing course, we will unpack the notion of a liberal education and its quintessential space, the university. We will critically examine the very idea of knowledge: What makes the knowledge you acquire here valuable? Which kinds of knowledge are considered to be significant and authoritative in the societies we live in, and why? How is this knowledge produced, for what purposes, and with what social effects? What are the entanglements between knowledge and power? Who has the authority to produce it, who do we count as an authoritative knower on an issue, and why? What makes this knowledge valuable to you and how does it serve the goals you came to pursue? The goal of this class is to encourage and enable you to critically reflect on the conditions of your learning and the purposes for which you are pursuing it. More specifically, you will learn about colonial knowledge production and its manifestations in the contemporary world. Thus, we will look at education in our postcolonial context, where there is nothing really post about colonialism. We will examine how dominant forms of knowledge production have been and continue to be shaped and influenced by colonialism. To do this, we will explore the history of colonial knowledge production, specifically focusing on the idea of the human as a primary way of understanding our world. Throughout the semester, we will explore topics of education, power, knowledge production, colonialism and humanity through the lens of philosophy, anthropology, history and literature, but also thinking of these various modes of knowledge production as intersecting with and informing each other. Our goal is to get you to think critically about different ways of understanding the world. We also want you to think about how we have gotten to where we are, as well as to equip you with tools for critiquing the world around you, especially your own university – your second home for the next two years. 10173	INTERDIS 207-0 Intro to Global Studies	70	UT	11:30 AM	12:45 PM	NUQ2-257	Celikkol,Yasemin	Global Studies is an emerging field that seeks to provide a holistic, transdisciplinary perspective on global issues and challenges, under the assumption that no one single academic field is sufficient to understand our hyper-globalized world. This is not a class about international (state-to-state) relations, or one that combines various strands of area studies to comprise a "world studies" class. Instead, this class will provide a comprehensive view of our world through an exploration of complex issues and challenges organized around three strands: global governance (states, intergovernmental organizations, civil society); global interactions (politics, economics, culture); and global challenges (human rights, development, migration, security, health, environment). This course will provide students with a global purview and a critical understanding of the interconnectedness of global phenomena and their impact on individuals and communities. The course will also encourage students to reflect on their own role as global citizens.	None	First-year students, sophomores and ABP Dual Enrolled students	Yes	
10120	INTERDIS 242-0 Topics in Sci & Tech Studies: Intro to Sci & Tech Studies	70	MW	8:30 AM	9:45 AM	NUQ2-201	Mohsin,Anto	This course introduces the interdisciplinary field of science and technology studies (STS), which is the study of science and technology in social context. Drawing on insights from the history and sociology of science and technology, the course discusses topics related to how and why people shape, develop, use, adapt, and contest scientific knowledge and technologies. It introduces important concepts such as "everyday science" and "sociotechnical system" in order for students to understand how science works and how to think about our technological world. 10193	INTERDIS 304-0 Exploring Environment Justice	70	UT	4:00 PM	5:15 PM	NUQ1-302	Mohammed,Sayeed	This course begins by examining the philosophical foundations and history of the environmental justice movement and concepts such as justice, race and class. Sustainability and equality, whether socially, economically or environmentally, at the national, regional, and global levels, cannot be achieved unless the underlying causes of environmental and social inequity are understood and addressed. This course will focus on struggles in the Global South. Through case studies, readings, and films, we will examine the following questions: How is it that certain groups of people do not have access to basic resources, or are systematically burdened with pollution or environmental hazards to a greater extent than other groups? What are the social relations of production and power that contribute to these outcomes? What can be done? How do we define "environmental justice"?	None	Sophomores and above	Yes	
10191	INTERDIS 316-0 Gender, Race, and Colonialism NEW	70	UT	10:00 AM	11:15 AM	NUQ2-255	Al Noaimi,Haya	This upper-level, interdisciplinary course explores the ways in which colonial power intersected with race and gender as social constructs during the period of European expansion (1500-1900s) and the effects of such constructions on colonized, and postcolonial societies in the modern period. We will study the relationships between European metropolises and their colonies, focusing on how knowledge was created and transferred alongside people and goods. The second part of the course looks at how colonized people interacted, collaborated, and resisted colonial governments, laws and institutions by exploring how race, gender and class structure interactions between colonizers and the colonized 'Other'. The aim is to understand how and why social categories of difference are used to inform power structures within colonial and postcolonial contexts in the Global South. By the end of this course, students should gain a deeper understanding of how gender and race intersected in ways that shaped the history of colonialism, its imposition, and by influencing modes of resistance to it. 10181	INTERDIS 379-0 Topics: Science/Tech Studies: Examining Disasters_STS Presp	70	MW	11:30 AM	12:45 PM	NUQ2-254	Mohsin,Anto	This course introduces the approach to analyzing technological and natural disasters by using a perspective drawn from the interdisciplinary field of science and technology studies (STS). In this course we will read and discuss case studies of industrial and natural hazards and reflexively examine how science and technology produce risk in today's world. We will explore and discuss ideas about risk and vulnerability as well as some conceptual tools to analyze various catastrophes. The emphasis therefore is on the non-technical aspects of disasters. 10179	POLI_SCI 390-0 Special Topics: Media & Politics in Arab World	70	UT	2:30 PM	3:45 PM	NUQ2-257	Al Hroub,Khaled	The course engages with the debates over the role of the media since the emergence of the independent Arab states in the first half of the 20th century through present time, and up until the influence of the media during and after the Arab Spring. Between these two time ends, the media has been part of broader processes of nation-building, ruling-elites consolidation, identity-creation and dismantling, as well as a crucial means of political opposition. The course examines how emerging states and governments in the region have used and manipulated the media for decades in their sustained effort to construct distinctive national identities. Thematically, the course covers a spectrum of topics including loyalist media and their role in supporting political status quo, oppositional and ideological media, the politics of private-owned media, media and political change, media and foreign policy, media and social change, media and religion, and the politics and influence of foreign media and off-shore Arab media. A considerable space and discussion is also devoted to transnational broadcasting media pioneered by AlJazeera in 1996. A similar focus is given to the emergence of social media along with youth activism in relation with raising the ceiling of free speech and creating spaces for political debates and criticism in the region. 10180	SOCIOI 242-0 Topics in Sociology: Intro to Sociology	70	MW	10:00 AM	11:15 AM	NUQ1-300	Mahmud,Hasan	The course offers students basic concepts and training to critically analyze societies, and the social positions of various actors and institutions. The primary aim of this course is to train the students in the quality of Sociological Imagination – the ability to see the interaction between individual's biography and history. Through readings, discussions and writing assignments, it will develop students' abilities to think critically about social issues, and to articulate these ideas in writing. Whether or not students choose to continue studying sociology outside of this course, gaining knowledge of the sociological perspective is a valuable tool for any individual because social structure impacts all members of society. After completing this course, students will have a better understanding of their social world and be able to develop and articulate informed personal opinions on social issues. In addition, students will gain the knowledge necessary to pursue future studies in sociology if desired, as well as critical thinking and analytical skills that will be useful in everyday life.
