10320	MIT 230-0 Understanding Media Contexts	70	UT	03:20pm	05:00pm	NUQ2-256	Pike,Kirsten	This course is an introduction to the study and structure of film and other moving-image media. We will define and examine the expressive and aesthetic power of the basic elements of the moving image. Specifically, the course will investigate—across a variety of different media, modes and genres, and historical periods—the fundamentals of production design; cinematography, especially the shot and its composition; editing; sound; and narrative structure. The first half of the course examines the separate elements of the moving image; the second half explores how those elements can be organized in various narrative and non-narrative structures. The goals of the course are (1) to acquaint students with a vocabulary specific to film and other moving-image media; (2) to provide students with the critical tools required for analysis of the moving image; and (3) to develop student skills in writing and argument for humanistic inquiry. By the end of the course, students will be able to: (1) identify the elements of the moving image (e.g., kinds of camera movement) and of the soundtrack according to a standard glossary of technical terms; (2) describe patterns of similarity, repetition, difference, and variation in the image and sound tracks; (3) propose connections between those patterns and narrative structure, character psychology, or larger themes and ideas; and (4) explain those connections in a written argument about how patterns in the most salient visual and/or aural elements of a film or program help us to understand its structure, characters, or themes. 10271	MIT 298-0 Undergraduate Seminar: GenAI/NLP in Media Innovation	70	UT	08:30am	10:10am	NUQ1-302	Zaghouni,Wajdi	Delve into the exciting world of AI with 'ChatGPT & NLP in Media Innovation,' a course designed to introduce the revolutionary impact of artificial intelligence in the media landscape. This course offers an in-depth exploration of ChatGPT and Natural Language Processing (NLP) tools and techniques, highlighting their applications in modern media. Students will gain practical experience in utilizing AI for data analytics, content creation, and reshaping traditional media formats. The curriculum includes an overview of AI fundamentals, a deep dive into the capabilities of ChatGPT, and hands-on projects using NLP tools for text analytics and creative writing. Designed for humanities and social sciences students, this course requires no prior technical background. Through a blend of lectures, interactive workshops, and project-based learning, students will uncover the potential of AI. The course promises to equip students with cutting-edge skills, preparing them for the evolving landscape of digital media. 10272	MIT 298-0 Undergraduate Seminar: Big Data & Media Analytics	71	UT	10:20am	12:00pm	NUQ3-216	Jones,Marc Owen	Big Data & Social Media Analytics provides students with essential tools and methods for analyzing social media and other media data. The course focuses on practical skills in network analysis, data visualization, and AI-assisted content analysis. Students will learn to use Gephi for network analysis, Tableau for creating visualizations, and Voyant Tools for textual analysis. Additionally, they will develop basic skills in data preparation, including cleaning and transforming datasets. The course emphasizes a hands-on approach, allowing students to apply these tools to real-world datasets from platforms like X (formerly Twitter), Tiktok, newspapers, and other media sources. Students will gain experience in identifying patterns, anomalies, and relationships within complex data, producing visual representations that can inform research or decision-making. By the end of the course, students will be able to define key concepts in network theory and data analytics, create visualizations, dashboards and conduct text analysis. The course is ideal for students in media, communication, and international studies programs, and it also serves as an elective for those in related fields interested in understanding how big data and media analytics shape global discourse. 10273	MIT 298-0 Undergraduate Seminar: Understanding Media Industries	72	MW	01:30pm	03:10pm	NUQ2-227	Khalil,Joseph	This course provides an understanding of media industries as structures of production, distribution, aggregation, and exhibition. Though writers, directors, and producers are key players in the development of media content, this course focuses on the business of media. Rather than providing a history of various media, we map the field of media industries as a discipline. We then examine terminologies, frameworks and methods that explain current dynamics and processes. The rest of the course will be dedicated to evaluating how media and technological developments change based on factors like ownership, regulation, marketing and branding. This hybrid course offers insights for students who desire to create media, introducing various contexts to help them define their place as an artist who must also be a businessperson. 10274	MIT 298-0 Undergraduate Seminar: Production Research	73	MW	03:20pm	05:00pm	NUQ2-227	Khalil,Joseph	Students learn essential knowledge and develop skills in conducting research for media productions. This course is part lecture, part workshop, and part practice. The goal of this course is to equip you with basic knowledge and resources to develop skills in researching for media productions. This course links research and production practices for developing scripts and documentaries. You will work individually and in groups. The emphasis will be on getting a creative/production researcher's experience. The class is divided in three modules covering media production research, ethnography, and oral history. 10279	MIT 325-0 Film, Media & Gender: Girls' Media Culture	70	UT	01:30pm	03:10pm	NUQ2-256	Pike,Kirsten	Although media made for girls has long been derided as silly and undeserving of close attention, to the millions of preteen and teen girls who consume it, it is anything but insignificant. From novels and movies in the 1930s featuring teen sleuth Nancy Drew to contemporary films and TV shows such as Whip It, Wadja, and That's So Raven, girls' media artifacts have functioned as important historical sites for the negotiation of cultural politics and youthful feminine ideals. In order to shed light on the often-overlooked history of girls' media, this course offers a critical investigation of (primarily) U.S. girls' media from the 1930s to the present, including novels, films, TV shows, advertisements, music videos, teen magazines, toys, and new media. We will investigate girls' media artifacts as aesthetic, political, and commercial texts through which youth have interfaced with lessons about gender, sexuality, race, ethnicity, class, national identity, and generation at different historical moments. Although American commercial media will be taken up as our main object of study, students will have opportunities to explore media made outside the U.S. in their own research projects, and we will consider girls' independent production and reception practices in both Western and non-Western contexts. Ultimately, the goals of the course are: 1) to explore the dominant strategies utilized by the media industries to represent female youth and their concerns, as well as those utilized by girls in practices of self-representation; 2) to examine girls' reception of and diverse engagements with media; and 3) to consider how the landscape of girls' media production and consumption has changed, and resisted change, over time. 10328	MIT 349-0 Internship	70	R	08:30am	11:50am	NUQ2-258	Akdenizli,Banu	This course provides academic structure and guidance for professional internships being completed by students in the Communication Program. The course covers organizational communication and behavior topics, including organizational cultures; working in teams; managing generational differences; effective workplace strategies; leadership and mentoring; work-life balance; ethics and soft skills; feedback and motivation; technology in the workplace; networking; and starting life as a young professional. In this seminar-style class, we discuss the readings and their relationship to events in the job sites; students share their progress reports, questions, and concerns about the work they are completing in various media-related jobs. Students are encouraged to explore the links and gaps between what they have learned in the classroom and what they are learning in the workplace, thereby developing their professional skills while deepening their academic experiences. Students are evaluated on a written final project and presentation and by their work site supervisor, as well as their weekly responses to the readings and other written work. 10358	MIT 376-0 Topics in Interactive Media: Vibe Coding	70	MW	01:30pm	03:10pm	NUQ2-256	Striker,Spencer	Vibe Coding is an entry-level creative coding studio for students who want to design and prototype interactive experiences, (e.g. games, apps, and websites), without needing a technical background. The course introduces coding as a creative language, where students use accessible, browser-based tools and AI assistants to bring ideas to life through motion, interaction, and design logic. Rather than focusing on traditional programming, Vibe Coding emphasizes exploration, iteration, and intuition: using natural language, students prompt AI systems to generate and refine code while learning the underlying principles that make digital experiences work. Along the way, they'll discover how concepts like timing, hierarchy, feedback, and user flow translate into expressive, responsive media. By the end of the term, students will have produced small, functional prototypes and learned how to think like designers who can also build. Vibe Coding prepares tomorrow's creators to lead the new era of digital storytelling, where concept, design, and natural language engineering converge. 10359	MIT 376-0 Topics in Interactive Media: Game Design	71	MW	03:20pm	05:00pm	NUQ2-256	Striker,Spencer	Great games can immerse us in wondrous, compelling new worlds. With the rise of virtual reality game technology—fully immersive interactive experiences have now become possible. This course guides you through the essentials of VR, AR, and XR game design, including such topics as: picking the right 3D engine, building a cross-functional team, developing 3D artwork, integrating 360 sound, prototyping, bug triage, polishing, publishing, and distribution. Along the way, we examine the role of the game designer—including the process of generating ideas, writing professional game design documents, and defining core loops, mechanics, dynamics, and systems. Next, we dive into character systems and the mechanics of chance, skill, tactics, and strategy. We define what makes VR game design unique from mobile or console, including previsualization for VR; avatars in the VR environment; 360 camera rotation; in-game hands; immersive audio design; and implementing 3D assets. Finally, students learn to pitch their ideas and explain how their game works—and why users will love it. We look at how to develop a game design portfolio in order to break into the game industry. 10394	MIT 394-0 Adv. Documentary Production	70	MW	03:20pm	05:00pm	NUQG-224	Williams,Marco	This intensive workshop course builds on the introductory documentary-making skills learned in MIT392, and will result in the creation of an 8-12 minute documentary, over the entirety of the semester, by each student. We will analyze observational, hybrid, personal, and traditional documentary forms from filmmakers in MENA, the U.S., Europe, and the Global South, to inform and inspire your work. We will examine more closely music, animation, archival and sound design as elements to incorporate into your final documentary. Development of your idea will be supported, and editing emphasized, through the sharing of required multiple cuts over the semester, for feedback from the professor and your colleagues. Festival strategy, outreach, and distribution across multiple platforms for your project will be explored. Students should arrive to the first day of class with a preliminarily researched idea, and ideally access to documentary participant(s) in place. 10268	MIT 398-0 Undergraduate Seminar: Media & Public Diplomacy	74	UT	01:30pm	03:10pm	NUQ2-258	Akdenizli,Banu	This course is an overview of the role of media and communication in public diplomacy and the rise of soft power as an instrument used by states and non-state actors to communicate, understand, and influence attitudes and behaviors. Public Diplomacy has been long regarded as an important tool in building and managing relationships; it influences thoughts and actions in the international arena via three major components: the government, the media, and public opinion. The media have played an integral role shaping and influencing images of countries through news or entertainment programming. With the advent of globalization and new communication technologies, the field has seen further changes, most significantly the increasing significance of the use of social media in global politics and social movements. Some of the particular themes explored in this course are: (1) social media and digital diplomacy; (2) the difference between propaganda and soft power; (3) international broadcasting; (4) culture and exchange diplomacy. By the end of the course, students will be able to: (1) identify how public diplomacy and the media interact; (2) recognize major concepts related to public/digital diplomacy and public opinion; (3) analyze the evolving role of state and non-state actor's practices of soft power. 10306	JOUR 201-0 Journalistic Storytelling	70	UT	01:30pm	03:10pm	NUQ1-213	Hassan,Lila	Students will produce a range of journalism stories across a variety of forms and platforms: writing for print and digital outlets, as well as creating audio, video and interactive graphics. You will also learn how to amplify your storytelling by tapping into social media tools to reach, attract and interact with a wider audience. This class is conducted in a collaborative atmosphere within a newsroom environment to produce stories prepared for the digital age. You will develop a strong sense of journalistic news judgment and be prepared to learn advanced areas of reporting and storytelling in future classes. This course builds on the introductory experiences in journalism received and techniques learned in your first year, developing these to master basic skills of journalism used in every storytelling format. These include news judgment, information gathering (including sourcing, discovering and covering different kinds of news, interviewing techniques, practices of inclusion and sensitivity); constructing stories (including leads, story structure, using quotes, using data to tell a story, assessing information); editing and presentation (grammar, punctuation, AP style, voice, tone and clarity); and visual literacy and presentation. This course emphasizes the critical practices of ethical journalism and deadline reporting and storytelling. The course also expands students' experience and skills in the use of multi-platform tools needed for effective, relevant and engaging storytelling for specific audiences. Professors will guide students in their continued development of reporting, interviewing, writing and researching with a sophisticated audience understanding using text, photos, audio and video for print, broadcast and/or digital platforms. 10375	JOUR 325-0 Journalism and Social Media	70	UT	03:20pm	05:00pm	NUQ2-257	Borges-Rey,Eddy	During the last two decades, social media has transformed Journalism. On the one hand, it has given news professionals an unprecedented capacity to engage in meaningful conversation with their audiences, which provides them with valuable insight to better understand the public, their preferences and their news consumption patterns. On the other hand, social media has enabled journalists to tell stories across a wider range of platforms, personalising their news offering, and reaching different demographics. Social Media has also come with challenges. Twitter, Facebook and news aggregators, such as Google and Apple News, are now users’ preferred news providers, even if the content is produced in mainstream media organisations such as the NYT or the BBC. This trend has seen advertising revenue shifting from mainstream media to online outlets, and from legacy organisations to social media platforms. With these developments in mind, this practical course introduces students to the use of social media for news gathering, production and dissemination. Through engagement with social media platforms such as TikTok, Twitter, YouTube, and Instagram, students will learn how to produce news, curate and verify information, engage with audiences and gain followers, do live reporting and social listening, and crowdsource investigations. Finally, this course will also train students to deal with toxic comments online and trolling.	JOUR 201-0	Juniors and above, JOUR majors only	No

This course seeks to examine the various ways in which automated systems – bots, neural networks, ranking and predictive algorithms, web metrics and dashboards, alert systems, Natural Language Generation platforms, machine-learning-driven moderation, business intelligence, etc. – are fostering new approaches in journalism practice. By looking at the case study of Generative AI, the course examines both the possibilities and limitations of this new model in journalism, with a strong emphasis on the importance of critical thinking and the need for robust fact-checking and verification practices when using these technologies. 10372	ENGLISH 217-0 Graphic Novels: Global South Graphic Novels NEW	70	MW	10:20am	12:00pm	NUQ1-212	Hodapp,James	While comics have come into their own as a legitimate visual art form accepted as "serious art" by academia, art curators, and cultural critics, within university curriculums they are still woefully underrepresented. This is doubly true for those from the Global South. In this course, we push back against this oversight to understand the immensely popular art form of Global South comics. We address why we study visual narratives from diverse cultural backgrounds from South America, Asia, Africa, the Middle East, and minority communities in North America, Europe, and Oceania. We ask if the experience of colonialism and white supremacy are the only factors that bind these Global South locales or whether a more resilient solidarity is possible in studying comics from places that have traditionally been on the losing end of global power structures, whether colonialism or globalization. This course pairs a formalist approach that considers panel formats, speech bubbles, splash pages and other formal elements of the comic form with a Global South approach that centers non-western visual narrative forms to offer a broad introduction. 10336	ENGLISH 242-0 Topics in Literature: Modern Middle Eastern Lit	70	MW	10:20am	12:00pm	NUQ2-255	Abu-Remaileh,Refqa	We will read a range of literature from modern Middle Eastern authors: short stories, novels, memoirs, essays and works of drama—most being translated works from Arabic, Persian, Urdu, and Turkish. We will examine and explore the splendors of this region through the voices of its writers and poets, whose literature tells urgent and liberating stories. With a wealth of contextual information that places the writing within the historical, political, and cultural breadth of the region, our analysis will create a vital bridge between modern Middle Eastern and Western cultures. In the introductory text ofthe course, Tim Cresswell writesthat “place is not just a thing in the world but a way of understanding the world.” Focusing on place in literary texts provides a critical lens that unlocks a rich variety ofsubjects:themes of identity, belonging, and displacement, as well asthe gamut ofsocial and political issues. This kind of place based analysis givesrise to a number of important questions as well: How can setting act as character? How does location become place? And, how fully can works of literature create place in the minds of readers? Asthe class encounters worksfrom a number of globalsettings,the common goal will be to utilize place as a method of inquiry to more deeply examine and comprehend the world. 10283	INTERDIS 203-0 Ways of Knowing	70	MW	08:30am	10:10am	NUQ1-300	El Zein,Dahlia	At Northwestern, we ask students to take liberal arts courses. There is an inherent belief that these courses lead us to better know the world around us. In this Ways of Knowing course, we will unpack the notion of a liberal education and its quintessential space, the university. We will critically examine the very idea of knowledge: What makes the knowledge you acquire here valuable? Which kinds of knowledge are considered to be significant and authoritative in the societies we live in, and why? How is this knowledge produced, for what purposes, and with what social effects? What are the entanglements between knowledge and power? Who has the authority to produce it, who do we count as an authoritative knower on an issue, and why? What makes this knowledge valuable to you and how does it serve the goals you came to pursue? The goal of this class is to encourage and enable you to critically reflect on the conditions of your learning and the purposes for which you are pursuing it. More specifically, you will learn about colonial knowledge production and its manifestations in the contemporary world. Thus, we will look at education in our postcolonial context, where there is nothing really post about colonialism. We will examine how dominant forms of knowledge production have been and continue to be shaped and influenced by colonialism. To do this, we will explore the history of colonial knowledge production, specifically focusing on the idea of the human as a primary way of understanding our world. Throughout the semester, we will explore topics of education, power, knowledge production, colonialism and humanity through the lens of philosophy, anthropology, history and literature, but also thinking of these various modes of knowledge production as intersecting with and informing each other. Our goal is to get you to think critically about different ways of understanding the world. We also want you to think about how we have gotten to where we are, as well as to equip you with tools for critiquing the world around you, especially your own university – your second home for the next two years. This course will trace circulations of this question in scholarly, popular, media, and religious discourses. Why and how does it matter what sound is called music and not, what music is called Islamic and not? We ask both how the thinking and the doing of music and Islam have been entangled in particular moments and places and how and why Muslim and non-Muslim scholars have sought out these entanglements. In the first part of the semester, we explore competing definitions of music and of Islam, unpacking the stakes of scholarly, theological, and popular inquiries into these demarcations. In the second, third, and fourth parts of the course, we dig into case studies under the themes of music in and of al-Andalus, “Islamic music” and the popular, and music and trance practices. 10368	INTERDIS 316-0 Gender, Race, and Colonialism	70	UT	10:20am	12:00pm	NUQ2-255	Al-Noaimi,Haya	This upper-level, interdisciplinary course explores the ways in which colonial power intersected with race and gender as social constructs during the period of European expansion (1500-1900s) and the effects of such constructions on colonized, and postcolonial societies in the modern period. We will study the relationships between European metropolises and their colonies, focusing on how knowledge was created and transferred alongside people and goods. The second part of the course looks at how colonized people interacted, collaborated, and resisted colonial governments, laws and institutions by exploring how race, gender and class structure interactions between colonizers and the colonized 'Other'. The aim is to understand how and why social categories of difference are used to inform power structures within colonial and postcolonial contexts in the Global South. By the end of this course, students should gain a deeper understanding of how gender and race intersected in ways that shaped the history of colonialism, its imposition, and by influencing modes of resistance to it. 10297	SOCIOL 242-0 Topics in Sociology: Intro to Sociology	70	UT	01:30pm	03:10pm	NUQ1-212	Mahmud,Hasan	The course offers students basic concepts and training to critically analyze societies, and the social positions of various actors and institutions. The primary aim of this course is to train the students in the quality of Sociological Imagination – the ability to see the interaction between individual's biography and history. Through readings, discussions and writing assignments, it will develop students' abilities to think critically about social issues, and to articulate these ideas in writing. Whether or not students choose to continue studying sociology outside of this course, gaining knowledge of the sociological perspective is a valuable tool for any individual because social structure impacts all members of society. After completing this course, students will have a better understanding of their social world and be able to develop and articulate informed personal opinions on social issues. In addition, students will gain the knowledge necessary to pursue future studies in sociology if desired, as well as critical thinking and analytical skills that will be useful in everyday life.
